

# Schedule Comparison App

**Team Members:** Danny Ta, Quan Do, Chaney Chantipaporn

**Description:** To create a mobile app to store schedules of the user and the user's friends to compare them. The app will be able to show when friends have free time during the week. The current apps available on the market only compare classes and does not take in account of work and club meetings, which impacts the free time a user has.

**Planned Features:**

- Save/edit schedules
- Compare schedules of one or more friends
- Schedule shows what free time the group of friends share
- View individual schedules
- Edit existing schedules
- Schedule is detailed with labels of specific classes/clubs/jobs
